24x7x365

SECURITY OPERATIONS CENTER

AS A SERVICE

There are two types of businesses: those that have been breached and those that will. Move beyond perimeter defense and prevention to SOC as a Service (SOCaaS), the next evolution of enterprise IT security. More than just detection and response, SOCaaS brings you actionable threat intelligence and the expertise you need to safeguard your business.

The Atomic Data Security Operations Center is built on three core functions.

THREAT DETECTION

Bringing together internal & external **data sources**, providing visibility into the threat landscape

INCIDENT RESPONSE

SmartResponse™ plans help **reduce** threat damage & **recover** from an incident as quickly as possible

MITIGATION

Repairing damage & eliminating vulnerabilities to **prevent similar events** in the future

What Security Operations Center as a Service means for you.

- Fully managed solution, saving you money on labor
- No dedicated hardware required & no software to maintain
- 24x7x365 monitoring limits the spread of threats, cutting costs for remediation
- Fills gaps in existing security posture without hiring expensive experts
- Threat intelligence prioritizes incidents & cuts out the noise inherent in logs

Log data is one of your most important assets for demonstrating compliance. The SOC leverages LogRhythm SIEM to aggregate data & continuously monitor a wide range of data sources across all environments.

✔ Firewalls ✔ Servers (AD, ISE, etc) ✔ Network Flow ✔ DNS ✔ Email Gateways ✔ HTTP/TLS

✔ Wireless Access Points ✔ Software as a Service ✔ Infrastructure as a Service ✔ Workstations

SAFE. SIMPLE. SMART.
