

PROFESSIONAL SERVICES

WORDPRESS SERVICES

Among all Content Management Systems, WordPress takes the cake when it comes to usability, community support, adoption, and flexibility. But beneath the surface lies complexity. Server architecture, backups, security hardening, maintenance, and customization all demand expert support.

Local, private hosting with the expertise to match

- **Atomic Cloud®** private Infrastructure as a Service managed entirely by Atomic Data
- **SOC 2 Type II attested** providing peace of mind that your backend is secure
- **Expert architects** to design high-availability deployments, create staging/production instances, map out disaster recovery, integrate a CDN, assess existing deployments, and more

Security hardening for your front-door to the world

Widespread adoption means widespread cyber attacks, making WordPress the most attacked CMS on the market. Our engineers fight back through a comprehensive and diligent approach to security hardening.

- **Security & policy scan** of cookie security, content security policies, cross-site scripting protections, and other HTTP security best practices
- **Account audit & hardening** to ensure user lists are current, permissions are correct, password policies are strict, multi-factor authentication is enabled, and insider risk is mitigated
- **Security plugins** like Wordfence are deployed and configured to provide IP blacklisting, firewall rules, reputation checks, geo-blocking, site-wide scanning, and advanced logging
- **Patch management** for WordPress Core and third-party plugins ensures vulnerabilities are patched quickly and cannot be used to compromise your site

PROTECTS AGAINST THESE WORDPRESS ATTACKS

- | | | |
|--|--|--|
| <input checked="" type="checkbox"/> Brute Force Attack | <input checked="" type="checkbox"/> Malware | <input checked="" type="checkbox"/> DDoS Attack |
| <input checked="" type="checkbox"/> SQL Injection | <input checked="" type="checkbox"/> Cross-Site Scripting | <input checked="" type="checkbox"/> Unpatched Versions |

On-going maintenance, support, and customization

- **Site backups, DNS/domain management, minor/major updates and site testing**
- **24x7 expert support** for site troubleshooting, critical issues, and resource mentorship
- **Theme and plugin development** extend WordPress functionality to your wildest dreams, allowing you to alter the look, feel, and feature-set of your sites
