ATOMICdata

BUSINESS CONTINUITY

ENDPOINT BACKUP AS A SERVICE (BaaS)

File backup and recovery from anywhere.

Secure your mobile workforce, cut down on user error, and prevent failure-related data loss with Endpoint BaaS. The secure and encrypted Endpoint BaaS solution enables users to back up from anywhere and restore their own files, mitigating risk in a work-from-anywhere world.

KEY FEATURES

- **256-bit encryption at rest & in transit**
- **Automated backups every 15 minutes**
- **Mac, Windows, & Linux compatible**
- **Multi-factor integration**

- **24x7 Atomic Data support**
- **Highly scalable as your business grows**
- **Managed & hosted in the cloud**
- **Role-based access management**

STRATEGIC TRANSFORMATION

By adopting Endpoint BaaS, your continuity strategy will transform in more ways than one. Reliable BaaS means you can avoid ransom payouts in exchange for encryption keys. You'll also be equiped to comply with legal hold and e-discovery requirements without sacrificing end-user productivity. And when it comes to device migration, our BaaS workflows cut device replacement downtime, ensuring users are back up and running in as little as 30 minutes, no matter their location.

IMMEDIATE BENEFITS

- Hardened security posture
- Increased legal compliance
- Expedited incident remediation
- Resilient ransomware protection
- Faster recovery time objectives
- Decreased risk of data loss

Flat $10/month per workstation.

Zero storage or file size limits.

SAFE. SIMPLE. SMART.
