

IT SECURITY AS A SERVICE

PATCH MANAGEMENT

Slow or no patching is a huge security risk. It's also low hanging fruit to step up your security posture. With Atomic Patch Management you'll get single source views of your systems and automated software patching schedules to drastically reduce your vulnerabilities and mitigate risk.

- Operating system patching for Windows, Mac, & Linux
- Third-party software patching for 200+ applications
- Automated new patch scans on each device
- Engineers review & approve patches daily
- Engineers on-call for post-patching remediation
- Custom patching policies & schedules available
- Monthly reporting available
- Keeps servers & workstations up to date

60%
Percentage of breaches resulting from unpatched vulnerabilities

Unpatched systems make ideal targets for malicious actors to gain unfettered access to your systems and confidential data. Each new patch represents a vulnerability — an unlocked window into your systems. Fast, automated patching is your best defense.

Take control of your endpoints regardless of operating system or device-type.

✓ **MAC/IOS**

✓ **3RD PARTY APPS**

Chrome, Firefox, Slack, Acrobat, and 200 more.

How it works

A lightweight agent is installed on each server, workstation or mobile device. Once updates are identified and white listed by engineers, the patch is automatically pushed to the device according to pre-defined patch windows. Based on your needs we can develop custom schedules and provide reporting in conjunction with vulnerability scans.

PATCH MANAGEMENT

Third-party apps you can update using Atomic Patch Management.

Get a handle on the sprawling set of 3rd-party applications running on your organization's workstations and servers. There are over 200 out-of-the-box third-party applications that can be updated using Atomic Patch Management. Here are some of the most popular:

7-Zip File Archiver	Google Chrome	OpenOffice	WinRAR
FileZilla Client	Mozilla Firefox	VMware Tools	Dropbox
Microsoft Skype	Tight VNC	Cisco Webex Meetings	Microsoft .NET Framework
Splashtop	Audacity	KeePass 2	RealVNC VNC Server
Adobe Acrobat Reader DC	Google Drive	Opera Browser	WinZip
Foxit Enterprise Reader	Notepad++	VMware Workstation Player/Pro	Evernote
Microsoft Teams	UltraVNC	Citrix Receiver	Apple QuickTime
TeamViewer	Box Drive	LibreOffice	Slack
	Jabra Direct	Oracle Java SE Development Kit (JDK)
