INTRUSION PREVENTION SYSTEM

cisco
We Sell Cisco

Headlines make it easy to believe that security is a large enterprise problem. But organizations of every size are targets. Targets of the latest worms, viruses, trojans, spyware, reconnaissance attacks, botnets, phishing tactics, peer-to-peer attacks, malware, and DDoS attacks. First generation, signature-based intrusion prevention systems (IPS) that lacked event context have given way to next-generation IPS (NGIPS), **providing the visibility, context, and low impact necessary to protect today's modern businesses.**

VISIBILITY & CONTROL ACROSS THE ATTACK CONTINUUM

BEFORE
- Control
- Enforce
- Harden

DURING
- Detect
- Block
- Defend

AFTER
- Determine scope
- Contain
- Remediate

MITIGATE YOUR BUSINESS RISK FROM

Zero-day attacks	✓
DoS attacks	✓
DDoS attacks	✓
SYN floods	✓
Encrypted attacks	✓
Worms	✓
Viruses	✓
Trojans	✓
Reconnaissance attacks	✓
Spyware	✓
Botnets	✓
Phishing	✓
P2P attacks	✓
Malware	✓

After first understanding your security requirements, Atomic Data's Cisco-certified Engineers create your custom Intrusion Policy. After collaborative review, the policy is then applied in a passive mode and tested for one week. Recommendations are generated, reviewed, then used to fine-tune the policy. Your policy is then deployed in active mode.

ALSO INCLUDES
- 24x7 monitoring
- Real-time logging
- Software/firmware updates
- Weekly & quarterly reports

SIMPLIFYING COMPLIANCE WITH
- Payment Card Industry Data Security Standards (PCI DSS)
- Health Insurance Portability and Accountability Act (HIPAA)
- Sarbanes-Oxley Act (SOX)
- Gramm-Leach-Bliley Act (GLBA)
- Federal Information Security Management Act (FISMA)
