

MICROSOFT® SERVER & WORKSTATION MONITORING & MANAGEMENT

Don't let your servers and workstations manage you. With Atomic Data's Server and Workstation Management & Monitoring solution, we'll keep your servers updated, monitor for and notify you of any issues, perform preliminary troubleshooting and incident triage, plus much more.

24x7x365 NOC MONITORING

Atomic Data's Network Operations Center (NOC) is always watching, notifying you immediately of any issues with your servers or workstations.

Kaseya® Virtual System Administrator™ enables NOC technicians to securely **monitor all aspects of device health, remotely access servers and workstations** to assist in issue resolution, **manage Windows patching**, generate reports, and much more.

PROACTIVE MONITORING

- ▶ Lightweight agent-based solution
- ▶ Proactive, real-time notification
