

ENTERPRISE NETWORKING

VENUES & PUBLIC SPACES

Serving as the **Owner's representative** for all things technology, Atomic Data will design, manage, build, integrate, monitor, manage, and support your large or medium scale public facing networks.

New construction or retrofit, 5,000 or 100,000 seats, our integrated technology management approach reinvents the model, serves your interests, and reduces fan technology friction.

Advisory

On-demand **Owner's Technology rep**, providing vendor recommendations and mapping business requirements.

Design

Whole **network design** and contractor collaboration that balances future proofing with optimal architecture.

Procurement

Component acquisition with money saving financing, RFP process representation, and **vendor neutral** evaluations.

Installation

Physical and virtual installation including **vendor coordination** and overarching project management.

Integration

Enabling connections between systems beyond the obvious, including cutting edge **smart suites**.

Finance

Zero capital expense financing with no post ground-breaking expenditures frees up capital and cuts loss.

Operate

Boots on the ground during events, warranty maintenance, 24x7x365 monitoring, plus our Game Day **Owner's Dashboard**.
