

## DATA SHEET

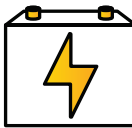

# DATA CENTER FACILITY SPECS

Atomic Data's data center space is available in five locations, supported by the Minnesota based headquarters in Downtown Minneapolis.

## SERVICE DETAILS

- CLIENT OPERATIONS** at all Atomic Data facilities are supported by 24x7 on-site personnel for first response to problems, service requests, and incidents. The Atomic Data Service Desk is an inbound triage team prioritizing issues, while the Atomic Data Network Operations Center is an outbound response team monitoring operations, infrastructure, and data centers. The Network Operations Center also offers on-site 'hands' support.
- SERVICE LEVEL AGREEMENTS** are offered at all in-market facilities, and are measured, checked, re-checked and continually improved upon by our Network Operations Center and Facilities Engineers.
- CARRIER NEUTRAL** all facilities offer a dedicated/direct to vendor meet-me room within the data center that connects clients to eight top telecom providers/ISPs, five of which are Tier 1 providers.
- BOLT-ON SERVICES** are available, including Infrastructure as a Service (IaaS) capabilities like virtual next-gen firewalls, virtual F5 load balancing, DDoS mitigation, ten gigabit switching, and self-managed cloud. Additional managed services include racking and setup, day to day management, strategic planning, compliance consulting, and a wide variety of operational supporting services.
