

# OVERVIEW

# ATOMIC DATA

Atomic Data is an on-demand, always-on, pay-as-you-go expert extension of the enterprise's IT team and infrastructure, always acting in the client's and the community's best interest. Founded in 2001, Atomic Data's 250 staff serve 600+ clients around the world.

## SAFE.

**IT security is not optional.** This idea drives what we do and how we think.

## SIMPLE.

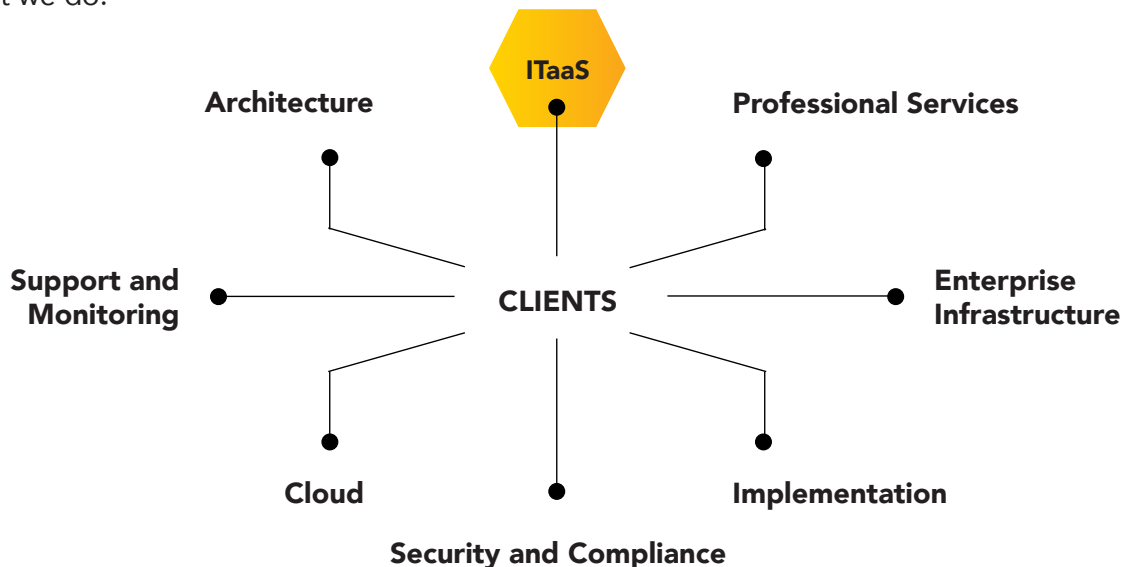

**IT is complex.** We manage this complexity for you so you can focus on your business.

## SMART.

**IT doesn't stand still.** Neither do we. We make it our priority to stay ahead of the curve.

**At Atomic Data, we meet you where you are.** The demands of your evolving business drive how we support you, not the other way around. We set up what you need and provide as much or as little maintenance as you want. It's called IT as a Service (ITaaS), and it's at the core of who we are and what we do.
