

SOFTWARE DEVELOPMENT

SHAREPOINT SERVICES

Make file sharing, document management, and collaboration look easy with Atomic Data SharePoint Services. Whether you're needing online or on-premises implementation, content migration, automated workflows, customization, or integration, we'll handle it all so you can maximize the benefits of SharePoint.

A versatile tool for the modern workplace.

Atomic Data engineers provide highly customizable SharePoint solutions proven to increase user adoption rates.

- Branded & stylized home & landing pages
- Custom environment set-up & hub build out
- Consolidated quick links section
- Company news & announcements section
- Master calendar with overlays
- High resolution logos & images
- Integrated color palette
- New hire corner & sliding gallery

More than a file share.

By partnering with Atomic Data, you get so much more than a file share. You get that additional layer of expertise and technical support you've been searching for.

- Site analysis & technical assessments
- Content migration & consolidation
- On-premises & online implementation
- Retention policies & metadata consultation
- Shared calendar integration
- Workflow development with Power Automate
- Microsoft Office integration
- Active directory permission mapping
- Site and document library templates & standards
- Global & contextual navigation

From concept to completion.

Atomic Data provides both technical expertise and comprehensive project management from start to finish. As a certified Microsoft Partner, we'll help you get all that SharePoint has to offer.

Analysis & Design Phase

In this phase, engineers meet with stakeholders to capture and document detailed user requirements. Key project check-in meetings are conducted and a final deliverable document is presented to executive project sponsors.

Implementation Phase

In this phase, engineers draw up an implementation plan and execute the software development. Engineers can also provide on-site & virtual trainings.
