

DATA SHEET

DATA CENTER FACILITY SPECS

Atomic Data's data center space is available in three locations, supported by the Minnesota based headquarters in Minneapolis, MN.

SERVICE DETAILS

- CLIENT OPERATIONS at all Atomic Data facilities are supported by 24x7 on-site personnel for first response to problems, service requests, and incidents. The Atomic Data Service Desk is an inbound triage team prioritizing issues, while the Atomic Data Network & Security Operations Center (NSOC) is an outbound response team monitoring operations, infrastructure, and data centers. The NSOC also offers on-site 'hands' support.
- **SERVICE LEVEL AGREEMENTS** are offered at all in-market facilities, and are measured, checked, re-checked and continually improved upon by our NSOC and Facilities Engineers.
- CARRIER NEUTRAL all facilities offer a dedicated/direct to vendor meet-me room within the data center that connects clients to a multitude of top telecom providers/ISPs, many of which are Tier 1 providers.
- **BOLT-ON SERVICES** are available, including Infrastructure as a Service (laaS) capabilities like virtual next-gen firewalls, virtual F5 load balancing, DDoS mitigation, ten gigabit switching, and self-managed cloud. Additional managed services include racking and setup, day to day management, strategic planning, compliance consulting, and a wide variety of operational supporting services.
