INFO SHEET

NETWORK ENGINEERING

Our network experts bring you vendor-agnostic architecture and support custom-tailored for your business. Here's how:

Atomic Tech Assessment
Engineers conduct an exhaustive review of your infrastructure across on-premises, virtual, and data center workloads to provide you with a comprehensive report on network health, age, warranty status, and more.

Game Day Enterprise Networking
Rightsize and modernize your venue or district with objective, holistic technology design, oversight, implementation, integration, and maintenance.

Equipment Implementation & Maintenance
We'll bring agnostic procurment, implemenation, warranty management, license management, and ongoing support to your entire network.

Security & Network Health Review
Engineers regularly analyze your network environment to provide recommendations for code upgrades, vulnerability remediation, and more.

Security Remediation
We'll strengthen your security posture through infrastructure testing, scanning, monitoring, patching, and 24x7 vigilance.

Change Management
Let us lead the way in building your change management process, keeping your business protected from unintended outages, security lapses and more.

Data Center Engineering
SOC2 Type II data centers with 24x7 monitoring handle any & all of your colocation, VPN, peering, managed firewall, and load balancing needs.

Circuits and Connectivity
We take away your need to deal with Internet Service Providers, while keeping your business connected and maintaining the availability and security of your internal networks.

SAFE. SIMPLE. SMART.
