

MICROSOFT INTUNE®

Your organization's employees utilize many devices to do their jobs. It's what makes your business work - and you need an endpoint management solution that's simple, secure, and allows your company to be free to take on the needs of the day.

Manage Microsoft Intune with Minnesota's leading IT provider

Keeping your company's endpoints secure and updated means ongoing, expert upkeep. That's where we come in: Atomic Data's Intune veterans will analyze your current ecosystem before implementing streamlined patching, updating, and device deployment processes and tools. All supported by around-the-clock monitoring and ongoing reporting.

InTune Expertise

Our experts will configure and deploy your InTune ecosystem and tailor it to your unique needs, and call out any would-be snags.

24x7x365 Monitoring

We'll support your InTune rollout with around-the-clock monitoring from our Network Operations Center.

Swift Implementation

Deploy Microsoft Intune in a quick, cost-efficient manner, scheduled and maintained by our engineers.

Microsoft Certified

Atomic Data is a Microsoft Partner, which means we will recommend best practices and remove roadblocks faster.

Documentation

We'll get you everything you need to maintain your InTune environment, from concise documentation to hands-on training.

Compliance Alerts

We'll watch your environment and policies with a compliance-minded eye, ensuring you get compliant - and stay that way.

Cost-Efficient

You'll get access to Atomic Data's top minds, for a fraction of the cost of an in-house, InTune-trained IT team.

Managed Updates

We'll analyze your ecosystem of Apple and Microsoft devices, and regularly ensure everything has the latest updates and patches.
