

OFFICE MOVES & ADDITIONS

Streamline your move and minimize downtime with our stress-free process.

It starts with discovery, ensuring we know exactly how your tech is setup across all locations. Then we'll spend 6-8 weeks preparing documentation, working with telecom providers, low-voltage contractors, and everything in between. On and after move day we'll be on-site and on-call to ensure the least possible business disruption.

Discovery & comprehensive planning.

We review these items and more to custom tailor your office move and ensure success.

CASE STUDY

Industry: Beauty & Hospitality **Size:** 300 staff **Need:** New multi-use office

In 2023, a Minnesota-based beauty salon was looking to move into a new, multi-purpose office space to accommodate their growth. This meant new network hardware, ISP changes, low voltage updates, and more. Despite construction delays, multiple complex vendor relationships, and the unique nature of the new office-conference-salon-warehouse space, Atomic Data's experts kept the move smooth and on schedule.

- Coordinated ISP options
- Deployed new Aruba switches & updated existing gear
- Developed installation plan
- Provided stress-free day one support
- Staged equipment for setup
