SECURITY & COMPLIANCE

SOC AS A SERVICE

Enterprise-grade, AI-powered SecOps–without the enterprise investment.

SOC as a Service (SOCaaS) is a comprehensive, AI-enabled security solution and cyber-response team designed to protect your entire digital footprint and strengthen your security posture. SOCaaS acts as an extension of your organization, allowing you to focus on your core business objectives.

Why IT Leaders Love SOC as a Service

Optimize Resources

Extend your team with on-demand security experts. No hiring, training, or scaling headaches.

Safeguard Your Data

Get 24x7 protection, proactive threat hunting, and compliance support across cloud and on-prem.

Reduce Costs

Lower overhead, predictable pricing, and no infrastructure to maintain or refresh.

What You Get from Atomic Data

AI-Powered Cyberthreat Defense autonomously detects, investigates, and responds to cyber-attacks across endpoints, networks, and cloud applications.

24x7 Security Operations Center (SOC) analysts and engineers are constantly tuned into your infrastructure, reacting quickly and decisively to every alert.

Security Information & Event Management (SIEM) is a correlation engine that detects, analyzes, and responds to threats across environments in real time.

Extended Detection & Response (XDR) agent provides centralized visibility, analysis, and response across networks, clouds, apps and endpoints.

Simplified Compliance with reduced audit complexity, insurance readiness, and a best-in-class cybersecurity posture provided by a SOC 2 Type II attested partner.

True Partnership built on a foundation of trust and delivered with speed, end-to-end incident resolution, and a human-first approach.

SECURITY & COMPLIANCE

SOC AS A SERVICE

Go beyond BYO SIEM, incomplete incident response, and staffing headaches.

Atomic Data's SOCaaS solution enables you to get out of the cyber incident response game and focus on your core business.
