

VULNERABILITY MANAGEMENT PROGRAM (VMP)

In the modern threat landscape, you need actionable threat intelligence for all your network assets across each attack surface, regardless of hosting location. By integrating the Atomic Data Vulnerability Management Program (VMP) into your security plan, you'll be empowered to address hidden security flaws before they wreak havoc on your network.

- ✓ Custom scan frequency (ad-hoc or automated)
- ✓ Active Directory assessments
- ✓ Custom remediation plans
- ✓ External scanning
- ✓ Network & asset scanning
- ✓ Compliance scans (CIS, NIST, PCI, etc)
- ✓ Unlimited device coverage

1) BASELINE ASSESSMENT

- ## 2) ONGOING PROGRAM

- Probe deployed
- Agent deployed on each device
- Network scanned
- Customized scanning schedules
- Security-based reports

Be security proactive.
